LE XUAN TUAN ANH

Senior Backend Engineer | SRE & Platform

No. 42, Lane 230, Me Tri Thuong Street, Me Tri Ward, Nam Tu Liem District, Hanoi City, Vietnam | +84 967 983 582 | tuananhptit0310@gmail.com | linkedin.com/in/anhlxt | anhlxt.dev

ABOUT ME

Senior Backend Engineer with 5 years of experience building and running production systems: API and data design, third-party integrations, background jobs, and real-time messaging. Hands-on SRE practice across Kubernetes and GitOps releases, secrets management, monitoring and error tracking, incident debugging, and security hardening. Works across Node.js/NestJS, PHP, Go, and .NET. AWS Certified Solutions Architect and Developer - Associate.

CAREER GOAL

In the next 3-5 years, aim to grow into a Principal Engineer role - driving system architecture and reliability strategy (SLOs, observability, incident response) across teams, while mentoring senior engineers and shaping long-term technology direction.

WORK EXPERIENCE

Senior Backend / Platform Engineer - FPT Corporation (FCI) **Jan 2026 - Present**

Partner Portal V2 - Enterprise Channel Partner Management platform for FPT Cloud International's global distribution network.

- Rated A in the Q1 2026 performance review.
- Owned the backend of Partner Portal V2 end to end: REST APIs, data model, and multi-stage approval workflows for partner onboarding, deal registration, marketing fund (MDF) claims, and revenue dashboards, with queue workers, schedulers, and a WebSocket server for async and real-time work.
- Integrated FPT ID SSO (OAuth2), LMS webhooks with user sync, S3, and CRM/Vtiger; built API-key auth, RBAC, and audit logging for partner access, and led remediation of three external penetration-test rounds (private S3 with presigned URLs, IDOR checks, rate limiting, upload validation).
- Shipped staging and production releases through the SRE team's ArgoCD GitOps repository (config maps, Vault-backed secrets, ingress including WebSocket routing), built the non-root container images with health probes, and wrote the SRE handover runbook (deploy, scaling, troubleshooting, go-live checklist).
- Set up Sentry error tracking and cron monitoring for scheduled jobs, routed application logs to the central Grafana stack, resolved SonarQube findings, and mentored engineers.

Fullstack Engineer - FPT Smart Cloud **Dec 2024 - Dec 2025**

- Received multiple awards in 2025, including an award at AIverse Hackathon 2025.
- Built backend features for CRM (Vtiger), Asset Management (Snipe-IT), and Payroll/Sales Incentive systems under Agile Scrum, including the Opportunity to Quote, Contract, and Invoice flow that improved financial reporting.
- Built the Payroll/Sales Incentive service with NestJS, TypeScript, MySQL, and TypeORM: Azure AD SSO, JWT, RBAC, KPI and incentive-rate modules, CRM user synchronization, and a React dashboard.
- Extended GitLab CI for the Asset Management service: tag-triggered image builds pushed to a private registry, merge-request-gated test runs, and corporate proxy support.
- Mentored interns and freshers, reviewed code, and shared knowledge on AWS, SOLID, and scalable design.

Software Engineer - The First One JSC investment from CNCTOR Japan Co., Ltd. **Aug 2022 - Dec 2024**

- MVP Employee of Q3 2023 and 1st Place Tra Da Team at CnctorJapan Hackathon and The First One 2024.
- Built backend services and business workflows across multiple domains using PHP, .NET, MySQL, and PostgreSQL, including query optimization for data-heavy screens.
- Operated AWS production environments (EC2, S3, CloudFront, Linux, Nginx): deployments, server configuration, SSL/domain setup, log investigation, and release support.
- Collaborated with leaders and PMs to develop and implement practical solutions.
- Participated in internal technology talks on JavaScript, Data Science, backend frameworks, and more.

Intern - MISA **May 2022 - Jul 2022**

- Passed exam and contributed to code exploration, UI design, and bug fixing using .NET and JavaScript.

CERTIFICATIONS

AWS Certified Developer - Associate **Sep 2025 - Sep 2028**

Credly: credly.com/badges/f058f6b0-1c47-43fa-86ed-a025cdaeaf7a

AWS Certified Solutions Architect - Associate **Aug 2024 - Aug 2027**
Credly: credly.com/badges/ed81cbeb-fe6d-4312-b7c3-907387071fa4

SELECTED PROJECTS

Partner Portal V2 **Jan 2026 - Present**
Role: Senior Backend / Platform Engineer. Backend: PHP 8.2, MySQL 8.0, Redis, REST API, OAuth2 SSO, JWT, queue workers, schedulers, WebSocket, S3. Platform: Docker, Kubernetes, ArgoCD (GitOps), HashiCorp Vault, Nginx, Sentry, Grafana. Frontend: Vue 3, TypeScript.

Asset Management (Open Source - Snipe-IT) **Apr 2025 - Dec 2025**
Developed asset, model, ticket, transaction, journal, and audit modules with policy-based authorization. Implemented large data export, recursive processing, unit and feature tests, GitLab CI image builds, documentation, and code reviews.

Sales CRM (Open Source - Vtiger customization) **Dec 2024 - Sep 2026**
Delivered 60+ tickets on the Opportunity to Quote to Subcontract to Contract to Invoice flow of the company CRM (PHP, MySQL, jQuery): stage and status rules, validations, tax and price calculation by product category, auto-processing of quotes for resell deals, quote document templates, and an Azure/GCP invoice export configuration. Integrated with Jira (ticket submission with audit logging), added Microsoft 365 (online) checks to quotes, and built the Partner Portal integration (sync API with field mapping and push logs, plus a raw-data API feeding partner dashboards). Hardened the CRM against XSS and SQL injection (output encoding, parameterized queries) and restricted about 20 cron scripts to CLI-only execution.

Payroll / Sales Incentive **Dec 2024 - Dec 2025**
Developed a Payroll/Sales Incentive service with NestJS, TypeScript, MySQL, TypeORM, Azure AD SSO, JWT, role-based permissions, KPI and incentive rate modules, CRM/Vtiger user synchronization, and a React dashboard.

Factory Operation - Print-on-Demand Fulfillment **Jun 2024 - Nov 2024**
Order fulfillment platform for a print factory (PHP 8.2 API, Vue 3 and TypeScript admin, MySQL, JWT, role-based permissions). Contributed to the base architecture and built the Product, Order, Fulfillment, and Stock modules: order list, edit, cancellation, status and shipment tracking, bulk order import and Excel export, advanced print-design listing, product and SKU management with variants, factory duration settings, and printer-tag print layouts. Cut query load with eager loading, chunking, and lazy collections, added feature tests, and set up the backend Docker and Nginx environment.

Peerto Booking System (STAYNAVI) **Nov 2023 - Jun 2024**
Hotel booking engine and central reservation system (CRS) for a Laravel platform. Built reservation, cancellation, and quotation flows for FIT bookings, integrated OTA channels (Rakutsu, Temairazu, Neppan, TL Lincoln) through SOAP/XML push jobs for bookings, inventory, and prices, handled GMO payment results, and ran scheduled OTA crawlers for hotel and room data. Optimized database queries, reviewed code, and wrote release notes.

Kakutenya - Uniform Rental and Laundry Management **Jan 2023 - Oct 2023**
REST API backend (PHP 8, MySQL, JWT) with role-based access for admin, customer, laundry, and warehouse users. Covered contracts, quotations, purchasing, warehouse inventory by shelf and position, barcode scanning, laundry tracking, customer requests (join, leave, repair), and real-time chat and notifications. Built scheduled batches: invoicing six times a month, monthly purchasing, and daily contract and staff status updates. Exported invoices to Excel/PDF, including the Infomart format. Optimized queries and supported interns and freshers.

Sanpo Kaisen **Aug 2022 - Dec 2022**
Developed production, order, and import-export management features using .NET, Vue.js, and PostgreSQL.

PERSONAL PLATFORM PROJECTS

Common stack: Kubernetes, ArgoCD, Jenkins, GitHub Actions, SonarQube, Vault, Prometheus, Grafana, Loki, non-root images.

Self-hosted Kubernetes Platform (learning4.uk) **Dec 2025 - Present**
Live learning platform with GitOps self-heal, HPA autoscaling, backups, k6 load tests, and a sandboxed code-execution service.

WebPhim - Video Streaming Platform (Go) **Sep 2026 - Present**
Hexagonal Go backend (API, key service, worker) with encrypted HLS streaming; CI with lint, race tests, and gitleaks, and change-based CD to Kubernetes.

Go E-commerce Microservices **Sep 2026**
Five Go services with rate limiting and RBAC auditing; govulncheck-gated CI and Kustomize staging/production overlays.

Finance Microservices (.NET 8, C#) **Sep 2026**
.NET 8 services behind a YARP gateway; releases gated by NuGet vulnerability, migration drift, and Trivy scans, with tracing and DR runbooks.

KNOWLEDGE

Backend: Node.js (NestJS), PHP, Go, C# (.NET), Python, RESTful API design, OAuth2/SSO, JWT, RBAC, queues and background jobs, WebSocket. Willing to switch to another language (Java, Rust, etc.).

Database: MySQL 8.0, PostgreSQL, Redis, schema design, indexing, query optimization.

SRE & Observability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, Jaeger, Sentry, health checks and probes, autoscaling (HPA), PDBs, backup and restore, load testing (k6), runbooks.

Cloud & Platform: AWS (EC2, S3, CloudFront, RDS, Lambda, API Gateway, SNS, SQS, CloudWatch), Kubernetes, Docker, ArgoCD (GitOps), HashiCorp Vault, Jenkins, GitLab CI, GitHub Actions, Nginx, Linux.

Security: OWASP remediation (IDOR, XSS, SQL injection, rate limiting), SonarQube, Trivy, govulncheck, gitleaks, Kubernetes NetworkPolicy and securityContext.

Software Engineering: OOP, System Design, Clean Code, SOLID, Design Patterns, Microservices, Message Queues, Event-driven design.

Frontend: Vue 3, React, TypeScript, Pinia, Vuetify.

AI & Productivity: Claude, ChatGPT, Cursor for brainstorming, code review, debugging, and development efficiency.

Tools & Collaboration: Jira, Confluence, Slack, Backlog, Sentry.

EDUCATION

Posts and Telecommunications Institute of Technology (PTIT) **Oct 2017 - Mar 2022**
Major: Engineering in Computer Electronics. Classification: Good.

COMMUNITY ACTIVITIES

AWS Study Group, Google Developer Group Hanoi, Laravel Viet Nam - Member (2022 - Now). Attend events to learn new skills and share knowledge about AWS SAA-C03 and AWS Certified Developer exam preparation.
