ABOUT ME

Senior Full-Stack Developer | DevOps Engineer with 4+ years of experience in Vue.js, Laravel, and AWS. Strong in scalable system design, clean architecture, cloud deployment, CI/CD, code review, observability, and DevOps engineering in product-oriented environments.

WORK EXPERIENCE

Senior Full-Stack Developer | DevOps Engineer - FPT Corporation (FCI)

Jan 2026 - Present

Partner Portal V2 - Enterprise-grade Channel Partner Management System for FPT Cloud International's distribution network.

- Architected a full-stack web application using Laravel 12 (PHP 8.2) backend with layered architecture and Vue 3 + TypeScript SPA frontend with Vuetify 3 Material Design.
- Designed relational database with 55+ migrations, 33+ Eloquent models, polymorphic relationships, and JSON columns on MySQL 8.0.
- Built complex multi-step approval workflows for Partner Applications (9 states), Deal Registration (3-tier approval), and Marketing Development Fund (12 states, 2 phases).
- Implemented real-time notification system using Laravel Reverb, Laravel Echo, and private channel authorization.
- Integrated FPT ID SSO (OpenID Connect), FPT Cloud S3, E-Contract digital signing, and CRM synchronization.
- Designed Docker infrastructure with 7 services and multi-stage builds with runtime environment injection.
- Led GitOps migration from push-based Jenkins CI/CD to pull-based ArgoCD with automated manifest updates.
- Deployed to Kubernetes with develop, staging, and production support, Ingress routing, and resource management.
- Implemented RBAC with 10+ roles and fine-grained permissions using Spatie Permission and CASL frontend authorization.
- Built 17 async email jobs, 13 broadcast events, and 18 mailable classes for complete lifecycle notifications.
- Created technical documentation, system flow diagrams, DevOps handover docs, and troubleshooting guides.

Fullstack Engineer - FPT Smart Cloud

Dec 2024 - Dec 2025

- Implemented CRM and Asset Management systems under Agile Scrum, delivering features that improved financial reporting.
- Mentored interns and freshers, reviewed code, and shared knowledge on AWS, SOLID, and scalable design.
- Completed the Opportunities to Quote to SubContracts, Contracts, and Invoices flow.
- Attended Alverse Hackathon 2025 and received a reward.

Software Engineer - The First One JSC investment from CNCTOR Japan Co., Ltd.

Aug 2022 - Dec 2024

- MVP Employee of Q3 2023 and 1st Place Tra Da Team at CnctorJapan Hackathon and The First One 2024.
- Worked with various business logics using Laravel, Vue.js, MySQL, PostgreSQL, .NET, and jQuery.
- Collaborated with leaders and PMs to develop and implement practical solutions.
- Participated in technology presentations on JavaScript, Data Science, Laravel, and more.

Intern - MISA

May 2022 - Jul 2022

- Passed exam and contributed to code exploration, UI design, and bug fixing using .NET and JavaScript.

CERTIFICATIONS

AWS Certified Developer - Associate

Sep 2025 - Sep 2028

Credly: credly.com/badges/f058f6b0-1c47-43fa-86ed-a025cdaeaf7a

AWS Certified Solutions Architect - Associate

Aug 2024 - Aug 2027

Credly: credly.com/badges/ed81cbeb-fe6d-4312-b7c3-907387071fa4

SELECTED PROJECTS

Partner Portal V2

Jan 2026 - Present

Role: Senior Full-Stack Developer | DevOps Engineer. Tech stack: Laravel 12, PHP 8.2, Vue 3, TypeScript, Vuetify 3, Pinia, MySQL 8.0, Redis, Docker, Kubernetes, ArgoCD, Jenkins, Nginx, Laravel Reverb, Laravel Echo, JWT, Sentry, S3, Maatwebsite Excel, TCPDF.

Asset Management (Open Source - Snipe-IT)

Apr 2025 - Dec 2025

Developed assets, models, tickets, transactions, journals, and audit modules. Implemented auditing, large data export, recursive processing, documentation, unit and feature tests, and code reviews.

CRM (Open Source - Vtiger)

Dec 2024 - Dec 2025

Participated in Opportunities, Quotes, Subcontract, Contracts, and Invoices modules. Applied SOLID principles and Strategy, Builder, Dependency Injection, and Factory Operation patterns.	
Factory Operation	Jun 2024 - Nov 2024
Contributed to project base architecture and developed Product, Order, Fulfillment, and Stock modules using Laravel, Vue.js, TypeScript, and MySQL.	
Peerto CRS (STAYNAVI)	Nov 2023 - Jun 2024
Developed CRS and FIT business logic, integrated site controllers and crawled data, optimized database queries, reviewed code, and wrote release notes.	
Kakutenya	Jan 2023 - Oct 2023
Built uniform rental management features using Laravel, Vue.js, and MySQL. Supported interns and freshers, optimized queries, and added barcode scanning.	
Sanpo Kaisen	Aug 2022 - Dec 2022
Developed production, order, and import-export management features using .NET, Vue.js, and PostgreSQL.	

KNOWLEDGE

Frontend: Vue.js, Vue 3, JavaScript (ES6+), TypeScript, HTML5, CSS3, Pinia, Vuetify 3, Bootstrap, CoreUI.

Backend: Laravel 12, PHP 8.2, PHP 7.x/8.x, C# (.NET basic), RESTful API, JWT, Spatie Permission.

Database: MySQL 8.0, PostgreSQL, Redis, relational design, JSON columns, polymorphic relationships.

Cloud & DevOps: AWS, Docker, Kubernetes, ArgoCD, Jenkins, GitHub/GitLab CI/CD, Nginx, CloudWatch, API Gateway, Lambda, S3, RDS, SNS, SQS.

Software Engineering: OOP, System Design, Clean Code, SOLID, Design Patterns, Microservices, Message Queue, RBAC, WebSocket.

AI & Productivity: GitHub Copilot, ChatGPT, Cursor for brainstorming, code review, debugging, and development efficiency.

Tools & Collaboration: Jira, Confluence, Slack, Backlog, Sentry.

EDUCATION

Posts and Telecommunications Institute of Technology (PTIT)	Oct 2017 - Mar 2022
Major: Engineering in Computer Electronics. Classification: Good.	

COMMUNITY ACTIVITIES

Laravel Viet Nam, AWS Study Group, Google Developer Group Hanoi - Member (2022 - Now). Attend events to learn new skills and share knowledge about AWS SAA-C03 and AWS Certified Developer exam preparation.
